

Relief Valve (Aluminum)

Model No.	Thread	Pressure Range
RV-A03	PF-1 1/4 "	0 ~ 300mbar
RV-A36	PF-1 1/4 "	300 ~ 600mbar

Airtec relief valves are suitable for both vacuum and pressure applications.

Relief valves can be adjusted by a simple screw to vary the pressure/vacuum level within the range.

The valves are designed to prevent overload (excessive back pressure) in a closed loop system.

Excessive back pressure can cause distortions in the impeller/housing due to increased temperatures and/or motor overload due to excessive current draw
